Teri Kirk | Senior Engineer, Environmental
ArcelorMittal Burns Harbor LLC
Peter,

Attached is the drilling and sampling plan for the Locomotive Fueling Station Remediation. We have installed the wells/piezometers, and have begun sampling. I appologize that we did not get this to you sooner, but we were told to get it done before the end of the year. We were not expecting to get this approved this year. If you have any questions, please let me know. Thank you

Dear Teri,

Attached is the finalized SAP incorporating the comments you provided on October 4, 2016 and the Draft water mark removed.

Sincerely,

Steven M. Stanford, LPG
